Automobile water temperature sensor

汽车水温传感器

产品特点 PRODUCT FEATURES

本产品采用稳定性好、可靠性高的玻璃封装NTC热敏 电阻,前端探头可直接接触水、冷媒等介质,装配方式通过螺纹组合密封圈固定,有效避免冷媒等液体介质渗漏。

This product adopts glass encapsulated NTC thermosensitive with good stability and high reliability resistance, the front-end probe can directly contact media such as water and refrigerant, and the assembly method is convenient fixed with threaded combination sealing ring, effectively avoiding leakage of liquid media such as refrigerant.

工作参数 OPERATION PARAMETERS

●电阻参数: R25=10KΩ±1%

B25/85=3435K±1%

●工作温度: -40 to +125℃

● 耐压测试: 3200V AC 1.0mA 1Sec

●绝缘电阻: 500VDC 500MΩ

• 响应时间: ≤7s

● 工作电压: 5±0.1VDC

● 工作电流: ≤0.5mA

● 对插件: 配对 DELPHI12092512

• Resistance parameters: R25=10KΩ±1%

B25/85=3435K±1%

• Operating temperature: -40 to +125℃

• Pressure resistance test:3200V AC 1.0mA 1Sec

• Insulation resistance: 500VDC 500MΩ

• Temperature response time: :≤7s

• Supply voltage: 5±0.1VDC

•Supply current: ≤0.5mA

•The plug-in models is:DELPHI12092512
